## RESOURCES

### CORPORATE PROFILE

McLaren Resources explores gold properties in the world class Timmins Gold Camp. McLaren is exploring a strategically located gold deposit adjacent to two of the largest gold mines in Canada.

The TimGinn property hosts the former producing Gillies Lake Mine situated on the key geological structure that made Timmins the largest gold camp in Canada.

The 2012 exploration program is underway with exploration drilling focused on a significant gold mineralized horizon which was a source of production for the neighbouring Hollinger and McIntyre Mines.

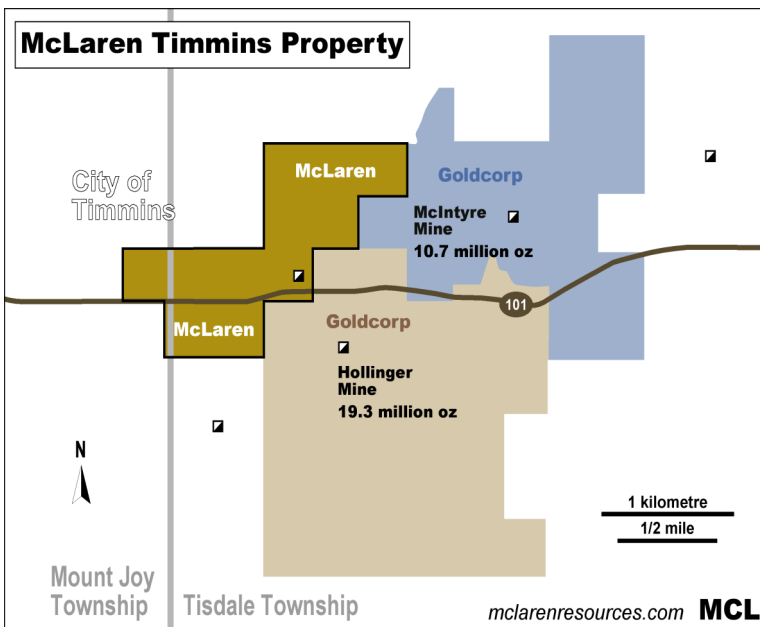

### TIMGINN PROPERTY

The Timginn property consists of 9 mining claims covering 238 hectares (588 acres) in Tisdale Township in Central Timmins.

The Property is adjacent to Goldcorp's Hollinger and McIntyre Mines which have combined production of more than 30 million ounces of gold.

The Property hosts the favorable gold mineralized horizon known as the 95/63 contact which crosses from Goldcorp's Hollinger and McIntyre Mines onto the McLaren's TimGinn property.

There was brief production on the property during the 1920's by Consolidated Gillies Lake Gold Mines which produced gold from an extension of a Hollinger Mine ore zone. A two compartment shaft was sunk on the property to a depth of 940 feet.

## TIMGINN HIGHLIGHTS

- The TimGinn Property has a 2000 meter strike length containing the 95/63 gold mineralized horizon which is the focus of exploration.
- Exploration potential goes to depth of greater than 1500 meters on this under explored property where previous work has only gone to a depth of 300 meters deep.
- Dilling is ongoing and historic gold zones have been confirmed.
- McLaren can earn a 60% interest in the property by spending \$4 million over 4 years to April 30, 2016.
- Timmins hosts many high grade gold mines that neighbour the McLaren TimGinn property, and significant new discoveries are continuing to be made in the prolific Timmins Gold Camp.
- Funded to continue the work program in 2012 with exploration drilling.
- Highly experienced exploration and technical team based in Timmins.

## BLUE QUARTZ PROPERTY

- Located 70km east of the city of Timmins on the Abitibi Greenstone Belt.
- Close to producing Hislop and Black Fox Mines.
- Potential for discovery confirmed by recent drilling programs.
